

Torale® Luxe

LEATHER'S ELEGANT ALTERNATIVE. TECHNOLOGY'S LUXURIOUS DESIGN.

The science of today has given us the fabric of the future. Finally, the bold look and the smooth touch of leather are available in a stylish, sophisticated alternative. Consumers demand materials that are more durable, yet also more in tune with today's green-minded attitudes. Now, they no longer have to sacrifice the precision, comfort, and flexibility they've grown accustomed to with leather. Technology has given us the fabric that satisfies all these needs and more: Torale® Luxe.

Beautiful and pliable, it performs wherever it's needed most.

- Furniture for the home and office
- Inside automobiles, RVs and yachts for comfort that stands up to constant use
- Airplane interiors and anywhere that requires specially designed lighter-weight materials
- Elegant fashion accessories and comfortable footwear
- Industrial applications
- Anywhere luxury is desired and the performance standards of leather must be met

EXCELLENT BY DESIGN, GREEN BY TRADITION

Designed by Toray, the creator of Ultrasuede® and a leader in the field of green innovation through technology, Torale® Luxe offers true elegance without the use of animal products. The internal layer is made through an environmentally friendly process that not only reduces CO₂ emissions but also provides softness, body and substance. The external surface of the fabric is treated with a special dry process that eliminates the need for harmful chemicals and the recapturing of byproducts. The construction of Torale® Luxe was formulated to meet industry needs for stretch and recovery—durable enough for industrial use but versatile enough for fashion, home and transportation applications, where luxury is expected.

From stain resistance to sheer comfort, from quality to lasting endurance, Torale® Luxe is built with smart and thoughtful efficiency to complement the entire line of Ultrasuede® products. It can be stacked while cutting, so wasted product is greatly reduced, allowing substantially more usefulness per square foot.

It's all part of Toray's long-standing commitment to building sustainable, more environmentally friendly products. This vision shines through in everything Toray does and is coupled with a relentless quest for excellence. The goal is not only to help foster a sustainable recycling society, but also to build a solid foundation for the future.

Torale® Luxe is the true alternative to leather, a supple and pliant material for a wide range of uses. It offers the perfect union of style and savvy for today's discerning consumer. This is how the future of luxury feels.

Torale® Luxe

THE LUXURY LEATHER ALTERNATIVE

TORALE® LUXE AT A GLANCE:

- Soft comfort that can wrap around virtually any surface
- Rich durable grain that emulates the finest leathers
- Reliable strength that also resists sagging, crocking, and shrinking
- Comfortable in all weather types
- Colorfast design and abrasion resistance
- A full range of color availability
- Optional antimicrobial treatments available to resist microbes, bacteria, mold and mildew
- An easily cleaned surface (mild soap and water followed by air-drying is all that's needed)

SPECIFICATIONS

Style: 5915 (Solids) & 5988 (Metallics)

Width: 54"

Put-up: 33 yard R.O.T.

Weight: 18.3 oz ± 1.6 oz per square yard

Thickness: 1.1 mm ± 0.15 mm

Composition:

Surface: 100% Polyurethane / Backing: 100% Polyester Microfiber

CHARACTERISTICS	MEETS OR EXCEEDS
Abrasion:	ASTM D 3597-02 (4157-02) Wyzenbeek—over 400,000 double rubs
F/R Rating:	CA Bulletin-117 ASTM E84 Class A FMVSS302 Can be treated to meet IMO 652 and CRIB 5
Pilling Resistance:	ASTM D 3511-02—Class 5.0
Tensile Strength:	ASTM D 5034-95
Tear Strength:	ASTM D 5733-95
Dimensional Stability:	ASTM D 3597-02/D5034-95 ASTM D 3597-02/D434-95
Colorfastness to Crocking:	AATCC-8-01 Class 5.0 (both wet & dry procedures)
Colorfastness to Light:	AATCC 16H—Class 5.0

ISO 9001 Certified Production Facility
